

Sustainable Procurement Policy Statement

Morson is committed to Sustainable procurement.

It is the policy of Morson to identify and manage the environmental, social and economic impacts within our supply chain.

We are committed to:

- Setting objectives and action plans in support of this policy, and pursuing continual improvement where practicable
- Ensuring suppliers have embedded sustainable and ethical practices within their organisation and who drive such practices within their own supply chain
- Identifying areas of higher risk within our supply chain and engaging with suppliers in those areas
- Complying with all applicable legislation

Through supplier selection and direct engagement, we will monitor suppliers that actively reduce their environmental footprint through:

- Carbon management, including the use of energy, water and materials
- Waste minimisation, both within their operations and through reduction of packaging
- Reducing the impact of deliveries

Morson is committed to drive not only local, but UK wide economic growth through:

- Supporting job creation and facilitating opportunities for small-and-medium-sized enterprises (SMEs) and social businesses
- Considering the life-cycle cost of products
- Providing the Living Wage (as a minimum) to employees and contractors

This policy will be communicated throughout the Morson Group.

It will be reviewed annually to evaluate continued relevance, monitor compliance and drive continual improvement.
